

LINGUISTIC VALIDATION CERTIFICATE

Patient Oriented Eczema Measure (POEM)

This is to certify that **Mapi Language Services** conducted the linguistic validation of the **paper** version of the **POEM** (source file name: **POEM_TS3.0_eng-GBori**) into **Hungarian for Hungary**.

The aim of linguistic validation is to obtain translations that are:

- conceptually equivalent to the original and comparable across languages;
- culturally relevant to the context of the target country;
- easily understood by the people to whom the translated instrument is administered.

This is achieved using a rigorous methodology¹ involving:

- a process which comprises several steps;
- the instrument's developer input on conceptual issues;
- a skilled team recruited by **Mapi Language Services** in the target country and headed by a consultant with knowledge of and experience in the field of Clinical Outcome Assessments. The consultant supervises and coordinates the linguistic validation process in his/her country;
- a centralized review process coordinated by **Mapi Language Services**, including quality control by linguists and discussions about translation decisions with the consultant at each step of the process.
- cross-cultural harmonisation to ensure common understanding of the instrument's concepts by all participants involved in the process and achieve conceptual equivalence across languages.

The aforementioned translation (filename : POEM_TS3.0_hun-HU, dated 18 December 2018) underwent the following steps:

- Clinician's review
- Cognitive Interview step on 5 patients with eczema
- Proofreading step

Mapi Language Services may not be held liable for any changes made on the translation after completion of project **2496-TR-0046** by **Mapi Language Services** on **18 December 2018**.
